

# EMOLLIENTS

## BEAUTYWAX SFEEL

**INCI:** Cetearyl Alcohol, Cetyl Palmitate, Sorbitan Palmitate, Sorbitan Oleate

It is a natural lipids compound that works as a co-emulsifier able to stabilize O/W systems. It improves the skin feel of the natural emulsion formulations. It is an olive lipids-mixture. It improves the spreadability of the formulas giving at the same time hydration to the skin structures and a pleasant sensation during the application.

## BEAUTYOLIVE CRYSTAL F

**INCI:** Hydrogenated Vegetable Oil, Olea Europaea ( Olive ) Fruit Oil, Olea Europaea ( Olive ) Oil Unsaponifiables

It is a multifunctional olive oil derivative. It improves the stability, shining and spreadability of the formula. Usable in double phases as emulsions and anhydrous systems.

## BEAUTYWAX LC

**INCI:** Cetyl Palmitate, Sorbitan Palmitate, Sorbitan Olivatate

It is a green wax able to add in lipophase of the emulsions and anhydrous system, improving the stability and the performance on the skin spreading. It promotes a liquid crystal structure in the emulsions.

## BEAUTYOLIVE CRYSTALWAX

**INCI:** Olea Europea ( Olive ) Oil Unsaponifiables

It contains squalene with anti oxidant and anti-bacterial properties, natural emollient with positive skin care activity. It helps to stabilize emulsions and adjust the viscosity.
